PROJECTS

Snackit
› A site designed to calculate the quickest route to a partnered store and a partnered school in the database for a volunteer to make a food delivery.
› Technologies: JavaScript, Node.js, Express, PostgreSQL, Knex.js, HTML5, CSS3
› Website: https://snaskit.herokuapp.com/
› GitHub: https://github.com/gdebell/snaskit

Steam Coffee Co
› A site designed for a user to order coffee. Site taught me directives, services, and controllers in Angular.
› Technologies: Angular, JavaScript, HTML5, CSS3, Materialize
› Website: https://gdebell.github.io/shopping-cart-application/
› GitHub: https://github.com/gdebell/shopping-cart-application/settings

Tai Chi Studio Two
› A site designed for a Tai Chi studio. Multi–tenancy implementation for visitor, student, and manager authorization. Site was created on a team that implemented pair-coding and agile work flow. Site taught me about branches, merge conflicts, promises, and how to use Pivotal Tracker, and Heroku.
› Technologies: JavaScript, Node.js, Express, PostgreSQL, Knex.js, Nunkucks, Bootstrap, HTML5, CSS3.
› Website: https://tai-chi-studio-two.herokuapp.com/
› GitHub: https://github.com/gdebell/tai_chi_studio_two

Dating for Nerds
› A site designed for a user to find a date.
› Technologies: Angular, JavaScript, HTML5, CSS3, Materialize
  Hosting, Command Line, Web API
› Website: https://gdating-f9760.firebaseapp.com/#/
› GitHub: https://github.com/gdebell/gdating

La Bussola Pizzeria
› A site designed for a Pizza Restaurant. Site taught me about form validation and responsive design.
› Technologies: JavaScript, HTML5, CSS3, jQuery, Bootstrap.
› Website: http://gdebell.github.io/form-validation-pizza-stream/
› GitHub: https://github.com/gdebell/form-validation-pizza-stream

Calorie Tracker
› A site designed for a user to track calories. Site taught me core and tool fundamentals.
› Technologies: JavaScript, HTML5, CSS3, jQuery, Bootstrap, Git, Github, Static-Site
  Hosting, Command Line, Web API
› Website: https://gdebell.github.io/unitOneProjectNutrientTracker/
› GitHub: https://github.com/gdebell/unitOneProjectNutrientTracker
